FINISH DISCLAIMER
20-A CLEAR SATIN ON CHERRY
40-A CLEAR SATIN ON MAPLE

RE: NAME:

PO: FAX:

All external wood parts used in the manufacture of David Edward seating and tables are of the highest grade Cherry or Maple solids and veneers unless otherwise specified. These, like all natural materials, have inherent disparities in color and grain pattern. Because of variations caused by nature, over which the company has no control, David Edward cannot warranty color, grain, or texture of wood.

Applying a clear, non-colored finish does not allow for staining, shading, nor unitoning that would otherwise provide a more consistent, uniform appearance. Matching of the graining or natural coloration of the wood with a clear finish is neither implied nor guaranteed. While our catalyzed finish system contains UV inhibitors, protection is afforded to the coatings not the substrate. Hence the Cherry or Maple substrate when finished in Clear Satin will have a tendency to "brown out" when exposed to direct sunlight.

By acknowledging this "FINISH DISCLAIMER" you understand that there will be variations in color, character, tone, and graining within the product and from product to product. Furthermore the actual finish may vary from the sample that has been provided. Variations between samples and finished goods should be anticipated and the substrate will "brown out"/fade when exposed to UV light.

Please indicate that you accept these terms and return via fax (410-242-0111) ASAP. A signed disclosure must be received prior to finishing. If color and graining uniformity must be assured then please change your specification to one of our standard pigmented finishes or submit a custom color to match that allows for uniform staining and shading.

Please Sign and return via fax ASAP. Signed disclaimer must be received prior to finishing.
